There is more money in legitimate speculation than in any other form of investment. Large and frequent profits make 100 per cent daily possible. In ract, it is difficult to place a limit to the possibilities of the earning power of money invested in this manner.

There is a decided lack of harmony hetween this statement the public's fault. Hecause speculations that extended the market and speculated unvisely, there is no sign in their acts that speak derimental to the investment. There is a right way of conducting these speculations, and nowhere will a faulty method bring its adherent to greef more quickly than in this very field. There has a right way of conducting these speculations, and nowhere will a faulty method bring its adherent to greef more quickly than in this very field. There has been an unaviolescent tendency on the part of the average speculator to hold on to his losses and cut short profits. Insufficient margins and a total disregard for system has been the undoing of most of those who have suffered.

The community of interest plan, that is, the consolidation of capital, is the secret provided able and honest men conduct the investments. The Commercial Stock and Grain Company, with offices at 114 Missouri Trust building. St. Louis Ma, has what experts declare a certain method of operation. It is perhaps unmeressary to explain that it is much more profitable to speculate on margins from 12 under the outpill purchase of stocks or grain.
